Lennox is 6 years old and to describe him simply - he is funny, flat out and has a good dose of cheeky. He is always on the go, whether it's mowing the lawn, blowing the driveway clean or on Dads excavator digging a hole for the pool. He's got a top personality and he has NF1! So this October, we are joining the fight against NF by fundraising in support of the Children's Tumour Foundation of Australia (CTF) and more specifically, Lennox.

We are five bearded blokes who finally found a good reason to shave off our pride and joy...and that reason is our little mate Lennox who has Neurofibromatosis Type 1 (NF1). NF is a genetic disorder that causes tumours to grow on nerves throughout the body, including the brain and spine. People like Lennox, are born Fighters. They face a life of uncertainty and tumours that can cause bone abnormalities, a loss of mobility, blindness, deafness, seizures, disfigurement and developmental delays.
